## DOWNDRAFT SANDING TABLES

**DUSKITS** offers a comprehensive line of downdraft sanding tables for industry, and table kits for smaller shops and individual craftsmen. All of our units are engineered with high capacity blowers and motors, utilize dual filtration design, and have ample filter area (up to 70% more than competitive units).

**DUSKITS'** finished tables are available in 36x48, 48x48, 36x72, and 48x96 top sizes. Common features include 2" square steel tube frames, dual filtration design, CNC milled 3/4" MDF tops, TEFC motors driving non-sparking **reverse incline** blowers, and a wooden framed top on a steel base. The 36x72 model can be ordered in a high capacity version which provides much higher air flow and greater filter area. Casters and/or removable legs are optional.

If you need quality downdraft equipment and can provide some of the materials and labor yourself, or want something a little different, then our kits might be of interest. These are available in top sizes of 36x48, 48x48, 36x72, and 48x96 (we are happy to provide assistance in modifying dimensions to suit). The kits have the same dual filtration design as our tables, and include the same high quality motor, fan and inlet cone, motor mount, CNC milled MDF top surface, motor switch (starter with overload protection on three phase kits), pre-filter media, and complete plans

**48 x 96 Table**

**Typical kit-built 36x72 table**

and instructions. Many shops will have most if not all of the necessary materials on hand already, with miscellaneous hardware (screws, bolts, glue, hinges and some wiring) a further requirement. Our kits are **not** available in high capacity versions due to filter area constraints.

Let **DUSKITS'** staff answer your sanding questions. Our wide experience, as both users and suppliers of sanding equipment, is a valuable resource that we are happy to make available to the industry.

## 36x48 Model Specifications

- ✧ 1.5 hp TEFC Motor
- ✧ 3500 CFM (free air)
- ✧ 4 16x25x1 pleated filters
- ✧ 4 20x25x1 pleated filters
- ✧ 37 inch working height  
(casters add 2 inches)
- ✧ Weight - 575 pounds
- ✧ Sound Level approximately 78 db
- ✧ Not available in high capacity model

## 48x48 Model Specifications

- ✧ 1.5 hp TEFC Motor
- ✧ 3500 CFM (free air)
- ✧ 8 16x25x1 pleated filters
- ✧ 37 inch working height  
(casters add 2 inches)
- ✧ Weight - 600 pounds
- ✧ Sound Level approximately 78 db
- ✧ Not available in high capacity model

### **Features Common to all DUSKITS Tables**

- ✧ Dual Filtration Design utilizing commonly available filters
  - Non-woven pre-filter material under top
  - MERV8 pleated filters around base (see below)
  
- ✧ Highest quality components throughout - most manufactured to **DUSKITS'** specifications
  - Reverse Incline Blowers for increased CFM at higher static pressures
  - TEFC motors (optional Explosion-Proof)
  - Heavy steel frames
  
- ✧ Casters and/or removable legs, or adjustable legs are Optional
- ✧ Side curtains Optional (for sanding tall pieces such as chair frames)
- ✧ Standard Non-Skid pad included - replace for a few dollars as required
- ✧ Designed and built by folks who have real hands-on sanding experience
- ✧ Blower(s) may be left running continuously to filter shop air if desired
- ✧ .75" CNC Milled MDF top surface
- ✧ Low Sound and Vibration Levels
- ✧ Rugged construction allows use as a workbench
- ✧ Standard filters are MERV8 rated. MERV11 and MERV13 rated filters available at additional cost
  
- ✧ Explosion Proof motors available if required. **NOTE: NOT** rated for explosive metallic dusts. Please contact us if your application requires sanding explosive metallic dusts (aluminum, magnesium). Tables with explosion proof motors require field wiring and remote starters.

**NOTES:** Prices and specifications subject to change without notice.

Normal delivery time is 20-25 working days ARO, special units will take longer.

Some electrical components may be imported. If you require US made parts, let us know - prices will change.

Three phase tables require the services of a qualified electrician at your shop.

All units are FOB Martinsville, Virginia. Special sizes and or configurations may be available - let us know your requirements.
